TEMPORARY OPPICES—Columbia street, New West-minster:

... — Langley street, Victoria;
MINING SUPERINTENDENT—GEO. ROBINSON, E-q.

This Company has been formed for the purpose of developing and working several extensive and valuable seams of Anthracite Coal lately discovered in Queen Charlotte Island.

At present this is the only mine of pure Antracite Coal known exist on the Pacific Coast, and from the large and increasing quantity required and shipped to San Francisco and other ports the discovery is one of great importance and value.

value.

The Company have had reserved to them the Government Twenty Thousand Acres femining purposes, five thousand of which is soured (at present) by lease at the nominal rent gli00 per annum, with the additional privilege purchasing 1000 acres at \$1 per acre for a tow

tite.

The coal seams, from three to seven feet it thickness, are situated on the South of Grahar Island, Queen Charlotte group, about 2000 yard from the shores of a fine Bay and about 400 fee above the level of the sea. the construction of areasy and inexpensive trainway about one fille! easy and inexpensive tramway about one mile ir length, together with a wharf of about 150 fee projection are all the works the Company wit require to enable them to offer coal in the mar kets.

The quality of the coal has been fairly tested.

The quality of the coal has been fairly tested. The engineers of several of the steamers have pronounced it to be of the very best quality; it has also been used by the proprietors of the foundries in the city of Victoria whose reports are an nexed, and declared by them to be equal if not superior to the best Ponnsylvania Anthracte Coal.

The great advantage of the position of the mine cannot be brought too prominently to the notice of intending Shareholders, its close proximity to the coast, together with its superior quality renders it of great value; also an easy access for vessels of any tonnage, a safe and commodious harbor perfectly sheltered and land locked with secure and good anchorage, will enable vessels at all seasons and weather to load at the Company's wharf.

There is a large demand for anthracite coal There is a large demand for anthracite coal to supply foundries, steamers, &c., &c., in SanFrancisco, Portland, Victoria and other ports, all of which has to be shipped from the Eastern States or from Europe at a great expense, the selling price ranging according to quality from Sib to \$25 in some markets, in others higher; the trade to Panama and along the Pacific const will be open with China and Japan. The naval stations of England, United States of America, France and Russia, must necessarily consume a large quantity.

MAGISTERIAL FREAKS.

Since the time of the renowned Dogberry magistrates have come in for their share o caricature. What with vanity on one hand, ignorance on another, and overstraining se verity in a third, justice is sometimes subjeoted to rather scurvy treatment in the magisterial court, and satirists afforded only too frequent opportunities of levelling their shafts at a position that should be above ridicule if not indeed above censure. We have been strenuous advocates for the establish ment of rural magistrates throughout the country districts; because we believe that independent of the saving on the ground of expense, we should have really a more sensible class of men picked from the settlers than we are likely to obtain from the generally useless class of individuals who come t colonies for the express purpose of getting offices. There are instances of course, isola-

ted ones fortunately, where this rule is some times difficult to be carried out, and where the Government is obliged to place the mag isterial power in the hands of men who how ever well meaning, are totally incompeten It is to one of this class we would especially call attention in the present article In another column it will be seen that H.M.S. Clio has been making a very successful raid among the Indian whiskey sellers along the North-west coast; and it will also be observed that Mr. Duncan, J. P. the Missionary at Metlakatlah, has been industrious in bringing the culprits to justice. There is a medium, however, even with Indian whiskey sellers, and we are sorry to say Mr. Duncan has overstepped this boundary. We have no sympathy for men who are guilty of so nefarious a crime as selling or giving whiskey to Indians; because the practice may lead at any time to wholesale murders; but there is something more injurious to society than a wicked man breaking the law-there is the overstraining of authority in the endeavor to punish. This Mr. Duncan has done beyond all precedent, -some of the men who were brought before him having been sentenced to a fine of £800 or eight years' imprisonment! We can scarcely credit the statement that an educated man brought up under the British flag, and made a justice of the peace, should be so thoroughly ignorant of the powers and jurisdiction of a magistrate. The fact, however should be sufficient to show to the British Columbian Government the necessity of weighing carefully the responsibility of appointing magistrates in places so far from supervision and control as Metlakatlah. A missionary like Mr. Duncan, whose zeal appears to so far outrun his discretion as to re cognize on more than one occasion the capture of whiskey sellers in foreign territories, and then sentence them to a term of imprisonmen outrageously beyond his jurisdiction, is the very worst specimen of material out of which to make a justice of the peace. A man who has apparently solittle reason in his dealings with the whites can scarcely be expected to exercise any sound judgment in his intercourse with the Indians, and we may expect at any time to hear of some serious collision be tween the two races up north. Whiskey selling to Indians can never be put down by overstretching the law; for the worst of criminals is entitled to the law's protection and Mr. Duncan, instead of facilitating the ends of justice, is simply, as events will

It is not the first time that attention has been called to the rather fantastic tricks of this missionary magistrate, who appears to exercise an autocratic power up North considerably more rigid than the ruler of the Russian Possessions. It is time that some curb should be placed upon the gentleman or some action taken by the British Columbian authorities that will relieve the people along the North west coast-Indians as well as whitesof the dread of being burned alive of subjected to some other equally horrible punishment for interfering with Mr. Duncan's rather extensive trade with the Indians. We are glad to find that the Clio has been successful in capturing some of the whiskey sellers that infest the northern waters, and in inspiring the Indians themselves with a wholesome dread of the law; but the absurd actions of Mr. Duncan almost neutralize everything that has been done. Missionaries are, no doubt, as a body very exemplary men but from the experience of every colony in which a civilized and uncivilized population to a certain extent intermingle, they have proved the most incompetent as well as the most dangerous persons to be entrusted with magisterial powers and responsibilities.

AUTHOR AND ACTOR-A London theatrical sheet says a word for dramatic authors:-There have been some speeches made lately as to the relations between manager and author, especially at the inauguration of the actly understand what that question had to do with any ceremony connected with almsactors. Had it been an inauguration of almshouses for authors, the matter ration of almshouses for authors, the matter might have been very different. It was not so, however, and the irrelevancy of the matter was passed over in the natural excitement which prevails on such occasions. The simple fact is—and we have called attention to this matter before—that British dramatic authors are underpaid because British andiences are satisfied with poor rechaufies of Fronch pieces, and because British managers and analysements to supply such was are not only content to supply such ware upon cheap terms to the public, but form a kind of combination against the admission kind of combination against the admission of any but a close borough of translators or adapters into their theatres. Doubtless they find that this plan is not upprofitable; but we doubt very much whether it is beneficial in the end. Under the present system the theatres are not filled half the year, and during the remainder they have to resort to the miserable and unsatisfactory system of papers (Codes.) He has been chosen mainly because, being a resident, he is considered best fitted to express the views and maintain the rights and public interests of 'his constituency. He is in a position to know what these are—and because his opinions, for the most part, are coincident with those of the gentlemen who supported him. We believe Mr. Ounningham will seek the good of the country in the promotion of every measure calculated to benefit its inhabitants, and pursue a line of policy consistent with the demands of the country. Follow no particular side—if two sides there are—in our Legislature; become the protege of neither person nor party that does not uphold and carry out, in a proper spirit, the 'well understood wishes of those of the people' most concerned in the prosperity of the whole colony. We must say, in justice to Mr. Ring, the unsuccessful candidate, that if he did not tell the electors what he does not believe in, his expressions of opinion as to what lieve in, his expressions of opinion as to what he does believe in were sufficiently and unmistakably pronounced to injure what little prospects he had of success. The bold deprospects he had of success. The bold de claration of a firm belief in the maintenance of the free port would not take at Nanaimo. However, we heard very little said disparagingly of Mr. Ring.

JOINT STOCK COMPANIES.

Where the Limited Liabilities Act Requires Amendment.

To the Editor of the British Colonist,—Sira,—It must be apparent to the most casual observer how injurious is the working of the Joint Stock Companies Act in this colony in preventing the formation of companies to prosecute any discovery or to carry out any enterprise.

Under the present system registration fees are charged on the principle of a sliding scale, instead of being ore fixed and uniform rate, merely sufficient to pay for the trouble of registration. HOLLOWAY'S PILLS AND OINTMENT.—Influenza, Colds.—In diseases of the throat and chest, so prevalent in this country, nothing so speedily relieves or so certainly cures as these inestimable remedies. These disorders are two often neglected at the commencement; or are injudiciously treated, resulting in either case, in disastrous consequences. Whatever the condition of the patient, Holloway's medicines will restore, if recovery be possible; they will retard the alarming symptoms till the blood is purified and Nature consumpossions, they wan rectain the anathing symposis, till the blood is purified and Nature consumales the cure, gradually restoring strength and vital nervous power. By persevering in the use of Holloway's preparations, tone is conferred on the stomach and frame generally; the thilds are her stomach and frame generally; the thilds are known to the stomach and frame generally; the strength of the stomach and frame generally; the strength of the s

Holloway's Ointment.—Wounds, Scalds, Burns, and Irritating Sores.—The peculiarly mild, soothing, anti-inflammatory power exerted by this Ointment strongly recommends its use to all persons who have charge of children. Accidents will occur in the nursery in spite of the greatest caution and utmost vigilance. The scratch, the burn, or the scald, treated early with this Ointment, assumes no angry aspect, and nover long torties the little sufferer, whose very cry excites each bystander's compassion and pierces the parents heart. Every nurse should consider this invaluable Ointment an essential to a well appointed nursery. The Ointment is applicable to any ore, whatever its character. It conducts to health as sure as the compass points to the north.

Holloway's Ointment and Pills—Palpitation, Shortness of Breath, Dropsy.—This last named disease is often preceded by irregular action of the heart, and difficult respiration which symptoms are always severe, and ever go from bad to worse, unless proper means of cure be resorted to. In Holloway's unrivalled Ointment and Pills' the dropsical patient will ever find succour; the present relief derived from the use of these remedies is marvellously quick and perseverance in the steady application of his noble Ointment invariably results in a lasting and satisfactory cure. The two medicines act with such energy on the circulation and absorbent system, that the dropsical fluid vanishes, and the sufferer finds all the oppressive symptoms daily decline, till natural health returns.

HOLLOWAY' OINTMENT AND PILLS.—Fistu las, Piles, Excoriations, and Strictures, are speedily relieved and ultimately removed by applying this Ointment after fomentation with warm water. Persons suffering from these scourges of the human frame should arrest their progress at once, for it is both insidious and rapid. Fistulas, if 'long allowed to go on unehecked, not only weaken the nervous system, but destroy life. The sooner these inestimable remedies are used the more certain is success; yet none should despair, hopeless cases have often yielded, and the sufferer has been saved a painful death. In excortations, a few applications of this healing Ointment effect a cure, while the Pills, conjointly used, are especially beneficial in relaxing and removing strictures, whatever their situation or duration.

Holloway's Ointment and Pills, a certain remedy for diseases of the skin—Ringworm, scurvy, scrofula, or king's evil, sore heads, and the most inveterate skin diseases to which the human race is subject, cannot be treated with a more safe and speedy remedy than Holloway's Ointment and Pills, which act so peculiarly on the constitution, and so purify the blood that those diseases are cradicated from the system, and a lasting cure is obtained. They are equally, efficacious in the cure of tumours, burns, scales, glandular swellings, idecrous wounds, rheumatism, contracted and stiffjoints. These medicines operate mildly and surely. The cure effected by them is not temporary or apparent only, but complete and permanent.

Holloway's Ointment and Pills.—The family medical chest that is furnished with those powerful remedies needs nothing more. Indigestion, general dibility, liver complaint, eruptions, sores, wounds, ulcers, tumours, &c., are infalibly cured by their use. They purify the blood and give tone and vigour to the whole system. The Ointment, when well rubbed into the parts affected, enters the flesh just as sale onters meat, and if the Pills be taken as an auxiliary, one cure is speedy, thorough, and permanent. These medicaments are composed of rare balsams, without the admixture of a grain of mercury or any injurious substance. They are peculiarly mild and gentle in their action, and are as safe as they are effectious.

Holloway's Pills and every function has base as they are efficacions.

Holloway's Pills —No family should be without these pills.—Their long-tried efficacy in removing indigestion, stimulating the bowels, and purifying the blood, have secured them imperishable praise throughout the globe. Whatever the disease, a few doses will relieve the more urgent symptoms and thereafter completely control all disordered action, rouse the tor pid liver, empty the enorged spleen, clense the obstructed kidneys, assimilate the food, improve the blood, and thereby confer on the brain and every function healthful vigour, natural activity, and wholesome regularity. In cases of indigestion, dimness of sight, headache, mental and physical lassitude, these restorative Pills act as a charm. They expel rheumatism and gout, while they infallibly correct female complaints in young and old, delicate and robust.

HOLLOWAY'S PILLS AND OINTMENT—Stomach and Kidneys. Between these two organs there exists a close and intimate relation which is demonstrated by the wasting which occurs in all diseases afflicting the kidneys. The disordered stomach is often the first index of renal irregularity. Holloway's remedies used at that juncture would cut short many a serious and fatal attack. They act with wonderful efficacy on every organ of secretion, but especially do they regulate the stomach, liver and kidneys, in restoring their healthy functions, and casting out any obstructions or impurities. It is necessary for the ointment to be well rubbed into the small of the back twice daily, when it is absorbed, and greatly augments the purifying and salutary influence of the Pills.

Holloway's Ointment and Pills—Acute Rheumatism. In all severe pains in the joints and muscles, after due fomentation with hot water, the soothing action of this Ointment is most remarkable; it seems at once to lessen inflammation, ease pain, reduce the swelling, restore the frecirculation, and expel the diseare. In these sum plaints, indeed, Holloway's Ointment and Pills are an infallible specific. The Ointment should be rubbed as near the part in pain as the patients can bear; it is absorbed and directly conveyed to the diseased textures, when, aciting on nerves, vessels, and guiders, it will, arrest disease and spain establish healthy action. The aperion and purifying qualities of the Pills have the happlost effect in assisting the Ointment.

HOLLOWAYS PILLS.—General debility, low spirits, and nervous irritation, are the consequences of dyspepsia or indigestion. The Pills soon give tane to the stomach, renovate the digestive powers, purify the blood, and give strength to the whole system. Sluggishness of the body and depression of the mild are succeeded by a cheerful activity of the physical and mental functions. Indigestion is the parent of so many evils, and is so common, so universal a complaint, that it is a great biesing that such a termedy as him invaluable medicine should have been discovered. No one need long suffer from indigestion with these Pills at nand.
